

El Sheikh Fadl-Ras Gharib Road

Client

Nemesis Contracting PLC

Scope of Work

Topographic survey
Geotechnical investigation
Detailed design
Shop drawings

Location

North of Menia, Egypt

Types of Activities

Civil
Electrical
Geotechnical
Infrastructure
Roads
Structural

The objective of the project is to construct a new 3-lane road (90 km length and 11.7 m width, Asphalt pavement type) connecting El Sheikh Fadl Village to Ras Gharib City, and to upgrade the existing road and the median in between, including the carriageway, shoulder and verge.

The project encompasses circulation plan, typical U-turns, road marking & signage, pavement layers and street lighting.
