The project involves the assessment and rehabilitation of an existing construction in Al-Sherouk City central area to accommodate the French University facilities in Egypt.

The 3-storey building encompasses four different faculties, administration facilities, 250-seat theater, labs, main library and other specialized libraries, and indoor and outdoor entertainment facilities distributed as follows:

- ground floor: entrance hall, three computer labs, main language lab, eight classrooms, theater, main library,

cafeteria and electromechanical and maintenance facilities

- first floor: lecture and exhibition rooms and six computer labs, in addition to staff and administrative offices
- second floor: ten language labs, large lecture rooms, ten computer labs, and specialized libraries
