

National Bank of Egypt Branches

Client

National Bank of Egypt (NBE)

Scope of Work

Design development
Detailed design
Tender documents
Construction supervision

Location

Sudan

Types of Activities

Architectural
Communications and security systems
Electrical
HVAC
Interior design
Mechanical Structural

This project involved design, renovation, and expansion activities for NBE branches. Renovations covered the interiors and MEP systems. ECG was in charge of enforcing steadfast quality and cost control measures during the construction, substantial completion, and final completion stages of project elements. ECG also ensured that the project was handed over to the client in compliance with the time schedule, and that document control activities were properly handled.

ECG's services for existing and future NBE branches shall include land plot selection for acquisition/leasing purposes; property evaluation (technical and financial); review, validation, and approval of designs pertaining to all trades; construction supervision of branches designed by ECG; tender review and evaluation; assessment of tender document packages prepared by others; and evaluation and selection of contractors' bids (technical and financial).
