Location

Sas AlNakhl, Abu Dhabi, UAE

Types of Activities

Architectural
Structural

Support facilities for the Petroleum Institute encompass offices, classrooms, computer laboratory, and staff administrative offices over a total built-up area of 2,700m².

Furthermore, a total built-up area of 1,150m² is devoted to a dining hall and a kitchen. Meanwhile, an indoor sports hall, with total built-up area of 8,400m², is developed with

separate zones for males & females, changing and locker rooms, a gym, and a coffee shop. Interconnected male and female zones accommodate an indoor common entrance and a squash court.

For the project whose total construction cost is US \$ 19 million, ECG's mandate also involved MEP coordination.
