Tender action
Construction supervision

Location

Tanta, Al-Gharbia, Egypt

Types of Activities

Architectural
Communications and security systems
Electrical
HVAC
Interior design
Landscaping
Mechanical
Medical Planning
Structural

The project covered the refurbishment of parts of the Tanta-based Al-Helal Al-Ahmar Hospital for Children's Cancer, without any interruptions to the daily operation of the hospital. Refurbished parts have a capacity of 50 beds for the Children's Cancer Hospital Foundation 57357 (CCHF) in Tanta. CCHF Tanta was designed as a fully independent unit employing systems identical to those established at CCHF Cairo.

CCHF Tanta includes an operation department, sterilization unit, morgue, intensive care unit, day-care unit, clinical pharmacy, kitchen, laundry, and outpatient

building. The hospital building comprises a ground floor, four typical floors, and a roof with a total built-up area of 7,142 m².

The design of CCHF Tanta involved a complete face-lifting for elevations to match the design of those installed at CCHF Cairo.
